DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a method of insuring a buyer, classified in class 705, subclass 4.
 - II. Claims 15-29, drawn to a method of obtaining insurance, classified in class 705, subclass 4.
 - III. Claims 30, drawn to a method of linking buyers with sellers, classified in class 705, subclass 26.
 - IV. Claim 31, drawn to a system for insuring a buyer, classified in class 705, subclass 4.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for insuring a person for car insurance. See MPEP § 806.05(d).

Art Unit: 3677

3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for insuring a person for car insurance. See MPEP § 806.05(d).

4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for insuring a person for car insurance. See MPEP § 806.05(d).

5. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used by automatically insuring the buyer based upon the amount of business that the buyer conducts with the insurance company.

6. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects; the method in Invention II has the effect of a buyer getting insurance, whereas the system in Invention IV has the effect of an insurance company being able to offer insurance.

Art Unit: 3677

7. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects; the method in Invention III has the effect of linking buyers and sellers together, whereas, the system in Invention IV has the effect of an insurance company being able to offer insurance.

8. Because these inventions are distinct for the reasons given above and the search required for each of the Groups is not required for each of the other Groups, restriction for examination purposes as indicated is proper.

9. A telephone call was made to Clyde Christofferson on two occasions between May and July to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
